## The preys

Collecting preys is the most important part of the game. To collect one, you have to get near it, and left-click on it. Each player can gather up to 5 preys. However, a player's score won't be counted for their team until they put their preys in the good cauldron by left-clicking on it.

## Combat

Beware of the fox! It will try to hunt and kill all the players. Players can also kill other players, and thus steal their preys, by left-clicking on them.

## End of the game

The game ends when one team gets at least 15 preys.
